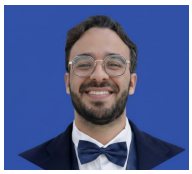
# Iheb Eddine Saafi

Software engineering student — DevOps, cloud and full-stack development



**Looking for a 6-month final-year internship (PFE) from January or February 2027, in France or Tunisia**

saafiiheb.si@gmail.com +216 28 478 199 Tunis, Tunisia github.com/iheb137
linkedin.com/in/saafi-iheb-8373211b8 Portfolio: portfolio-psi-two-8xeq195crp.vercel.app

I build applications end to end and ship them with what makes them operable: automated tests, Docker images, CI/CD pipelines, Kubernetes manifests. Target areas: DevOps, cloud, backend, full-stack, AI applied to software.

## Work experience

**Engineering intern — development and MLOps** | Tunisie Telecom, IT department, Tunis — Jul – Aug 2026

*Fraudulent call detection platform* (IRSF, Wangiri, SIM boxing, PBX hacking), designed and built on my own.

- Spring Boot 3 backend (REST API, JWT, role-based access control across 3 profiles), Angular frontend, FastAPI ML service.
- Real-time CDR ingestion through Kafka (KRaft), idempotent consumer and prediction upserts to prevent duplicates.
- Random Forest model (scikit-learn) with a retraining cycle: analyst labelling, AUC / precision / recall comparison, manual promotion and hot reload.
- 19 JUnit 5 / Mockito unit tests and pytest tests run in CI; JaCoCo coverage; SonarCloud analysis.
- GitHub Actions pipeline publishing 3 Docker images; Kubernetes deployment in 8 manifests (StatefulSets, persistent volumes, probes, HPA, non-root containers).

Java 17, Spring Boot, Angular, FastAPI, scikit-learn, PostgreSQL, Kafka, Docker, Kubernetes, GitHub Actions

**DevOps intern** | BIAT Innovation & Technology, Tunis — Aug – Sep 2025

- Designed and set up a Jenkins CI/CD pipeline; Bash scripts automating recurring operations tasks.
- Containerized business applications with Docker and orchestrated them on Kubernetes.

## Projects (source code at github.com/iheb137)

**MecaManage — multi-garage workshop management** | team project, 4 people — Mar – Apr 2026

Owner of the .NET 8 Clean Architecture backend: EF Core, JWT with refresh tokens, RBAC, multi-tenant API, AI service integration, xUnit / Moq tests run in CI; three n8n automation workflows. Delivered through reviewed pull requests.

**IH-AR Hotel Management — DevOps industrialization** | two-person project — Dec 2025 – Jan 2026

Four-stage GitLab CI pipeline (validation, PHPUnit with coverage, PHPStan and SonarCloud, Docker Hub build and publish on main) and a docker-compose environment (PHP, nginx, MariaDB) for a Symfony 6.4 application.

**Smart Career Hub — recruiting platform** | academic project — Sep – Dec 2025

Spring Boot API, Angular console and a FastAPI microservice using LLaMA 3 for CV analysis and quiz generation; PostgreSQL and MongoDB.

**iHar — car rental website** | personal project — 2024 – 2025

Containerized PHP site deployed to a local Kubernetes cluster by a Jenkins pipeline (build, push, kubectl set image).

## Technical skills

**DevOps and CI/CD**: Docker, GitHub Actions, GitLab CI, Jenkins, SonarCloud, Bash
**Containers and infrastructure**: Kubernetes (Deployments, StatefulSets, HPA, Secrets), Kafka, nginx, Linux, Vercel
**Backend**: Java / Spring Boot, C# / .NET (Clean Architecture), Python / FastAPI, PHP; REST, OpenAPI, JWT, RBAC
**Frontend**: Angular, React / Next.js, TypeScript
**Data and AI**: PostgreSQL, MySQL / MariaDB, MongoDB; scikit-learn, model retraining, LLMs, RAG
**Testing and quality**: JUnit 5, Mockito, xUnit, pytest, PHPUnit, PHPStan, Vitest, Playwright

## Education and certification

**Engineering degree, Software Engineering and Information Systems (GLSI)** | TEK-UP University, Tunis — 2024 – 2027

Final year in progress; the six-month PFE completes the degree.

**Preparatory classes, Mathematics-Physics** | IPEI El Manar, Tunis — 2020 – 2024

**Certified Kubernetes Administrator (CKA)** | Linux Foundation / CNCF — in preparation

## Involvement and languages

**IEEE TEK-UP Student Branch**: vice-chair (2025), then Student Branch advisor (since 2026) — project planning, event coordination, mentoring the board.

**Competitions**: IEEEXtreme 18.0 and 19.0 (24-hour team programming); TSYP 12 and 13 congresses; member of Securinets TEK-UP (cybersecurity) since 2024.

**Languages**: Arabic (native), French (bilingual), English (fluent).
